Goal #10 – Reduced Inequalities

Reduce inequality within and among countries

By 2030 the UN want to:

10.1 Progressively achieve and sustain income growth of the bottom 40% of the population at a rate higher than the national average.

10.2 Empower and promote the social, economic and political inclusion of all, irrespective of age, sex, disability, race, ethnicity, origin, religion or economic or other status.

10.3 Ensure equal opportunity and reduce inequalities of outcome, including by eliminating discriminatory laws, policies and practices and promoting appropriate legislation, policies and action in this regard.

10.4 Adopt policies, especially fiscal, wage and social protection policies and progressively achieve greater equality.

10.5 Improve the regulation and monitoring of global financial markets and institutions and strengthen the implementation of such regulations.

10.6 Ensure enhanced representation and voice for developing countries in decision making in global international economic and financial institutions in order to deliver more effective, credible, accountable and legitimate institutions.

10.7 Facilitate orderly, safe, regular and responsible migration and mobility of people, including through the implementation of planned and well-managed migration policies.

How are the UN going to make this happen?

10 (a) Implement the principle of special and differential treatment for developing countries, in particular least developed countries, in accordance with World Trade Organisation agreements.

10 (b) Encourage official development assistance and financial flows, including foreign direct investment, to states where the need is greatest, in particular least developed countries, African countries, small island developing states and landlocked development countries, in accordance with their national plans and programmes.

10 (c) By 2030, reduce to less than 3% the transaction cost of migrant remittances and eliminate remittance corridors with higher than 5%.

Organisations making a difference...

Children in Crossfire

Children in Crossfire was founded in 1996 by [Richard Moore](#). In 1972, as a 10-year-old child, Richard was blinded by a rubber bullet fired by a British soldier during the Troubles in Northern Ireland.

Children in Crossfire is driven by our vision for a compassionate world where every child can reach his or her potential. For us, this is not a dream but something we can really make tangible through our work. It is essential that as we work for **change**, we also nurture [compassion](#) as the underpinning core value that drives people to take actions for a better world for all children.
